

# LifePak 15 (Stryker Contract)

The LP-15 is used to monitor patient's heart rate, oxygen saturation & CO2 levels.

The LP-15 can do 12-lead EKG with a print-off of the rhythm that is sent ahead to the receiving hospital

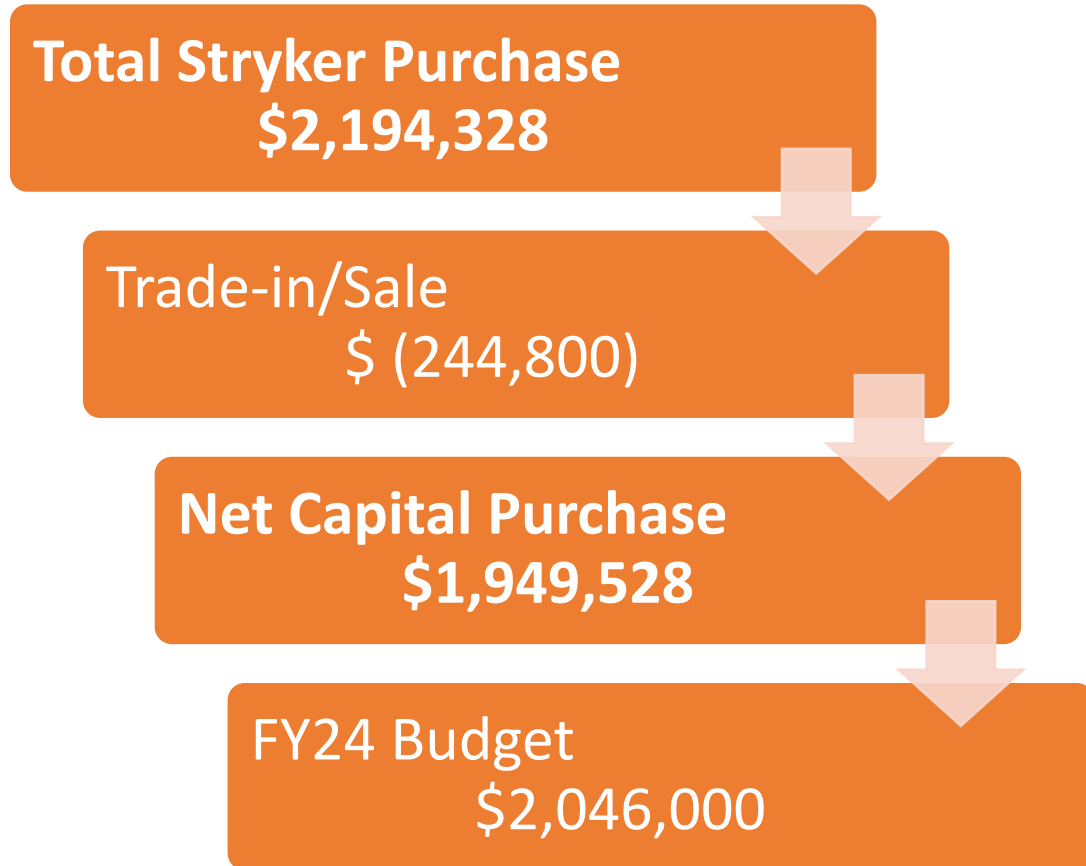

The LP-15 acts as a defibrillator if a patient is in cardiac arrest

**“To serve our communities’ pre-hospital needs through value-driven, compassionate, and clinically superior care.”**
