# Revenue Cycle KPIs January 2024

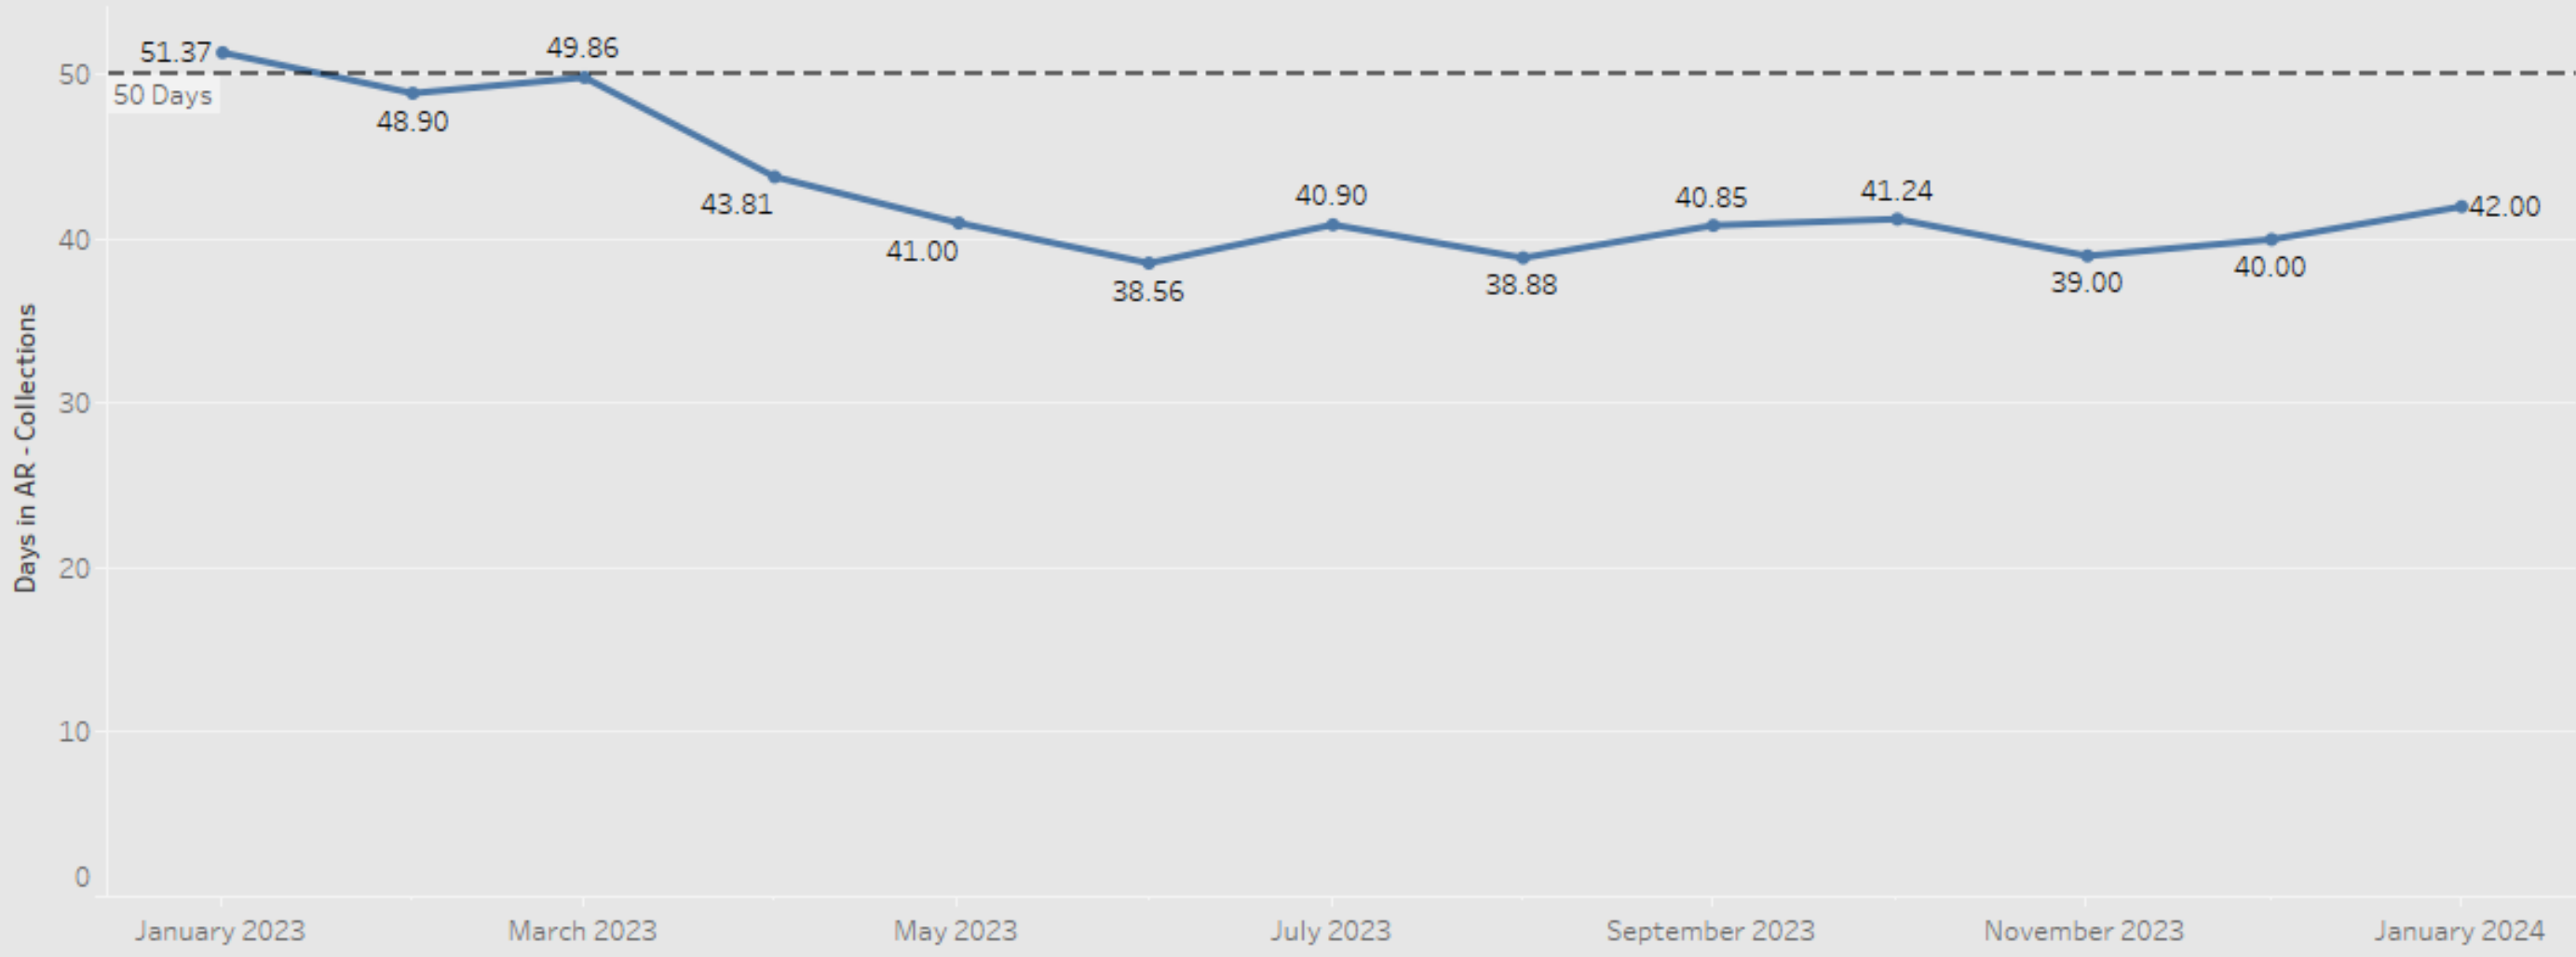

# Days in AR

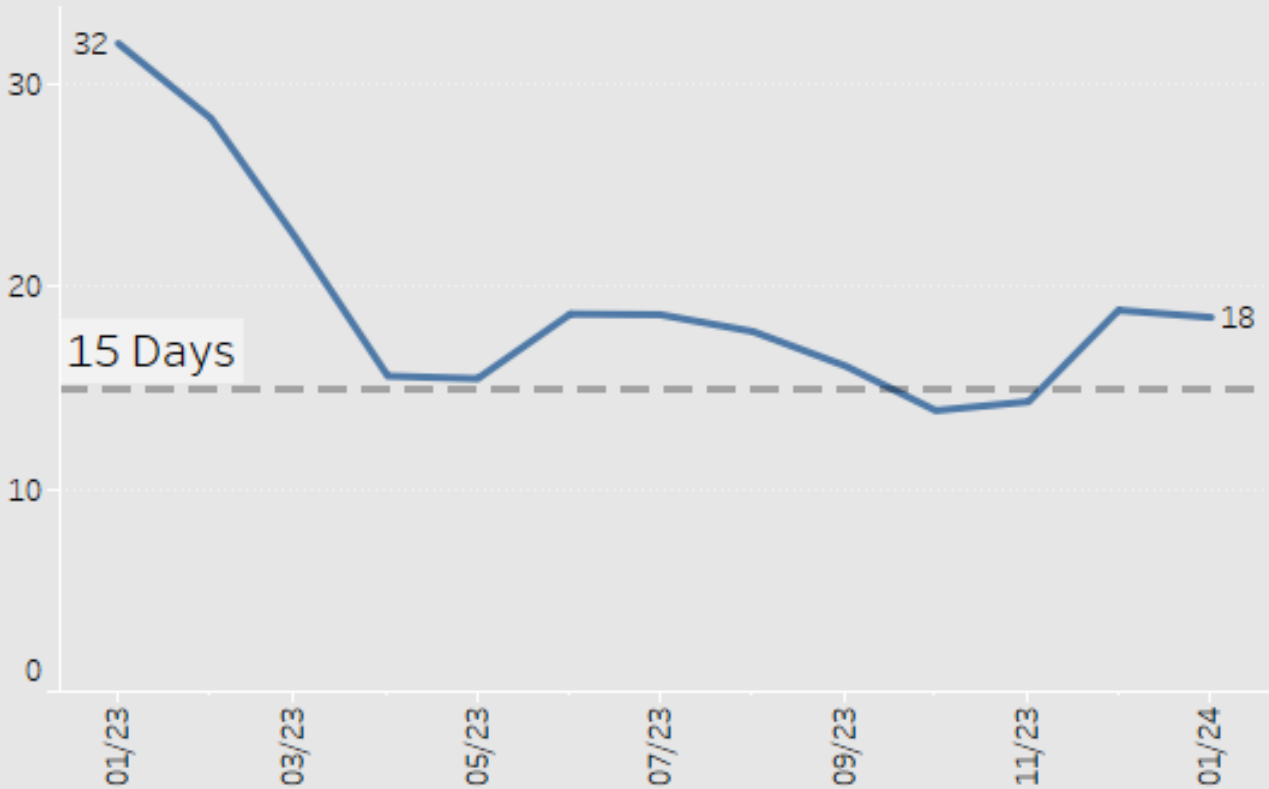

January 2024

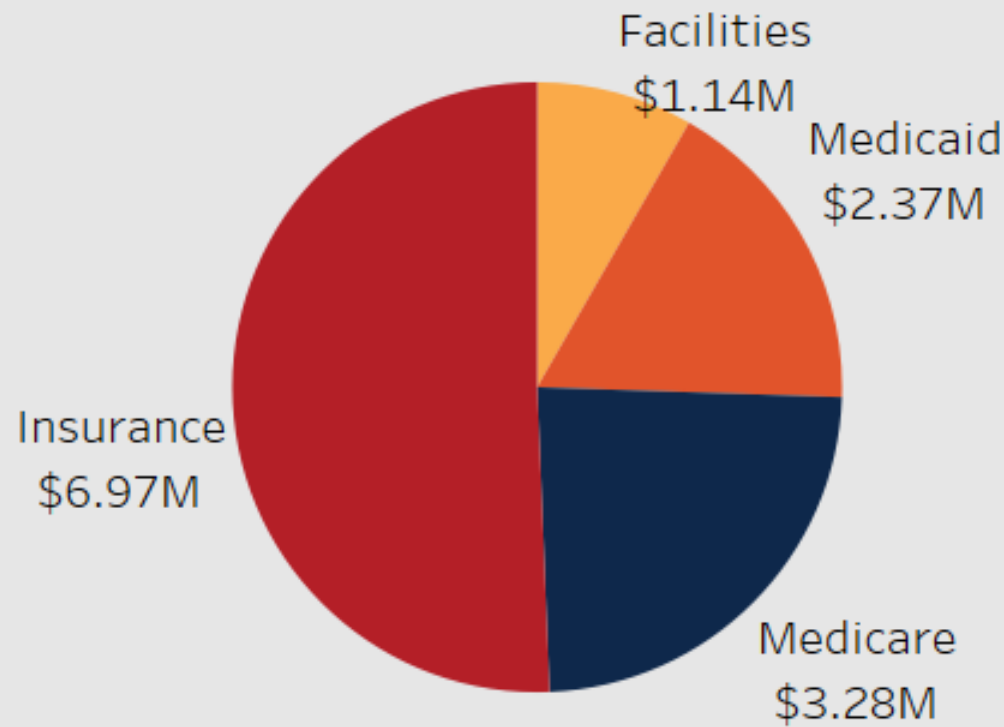

Days in AR were stable, with a slight uptick due to an increase in transport volume, and also showed a slight increase in Aging. The billing team continues to focus on outstanding AR, with significant efforts on Insurance & Contract payor types.

**\$6.97M**

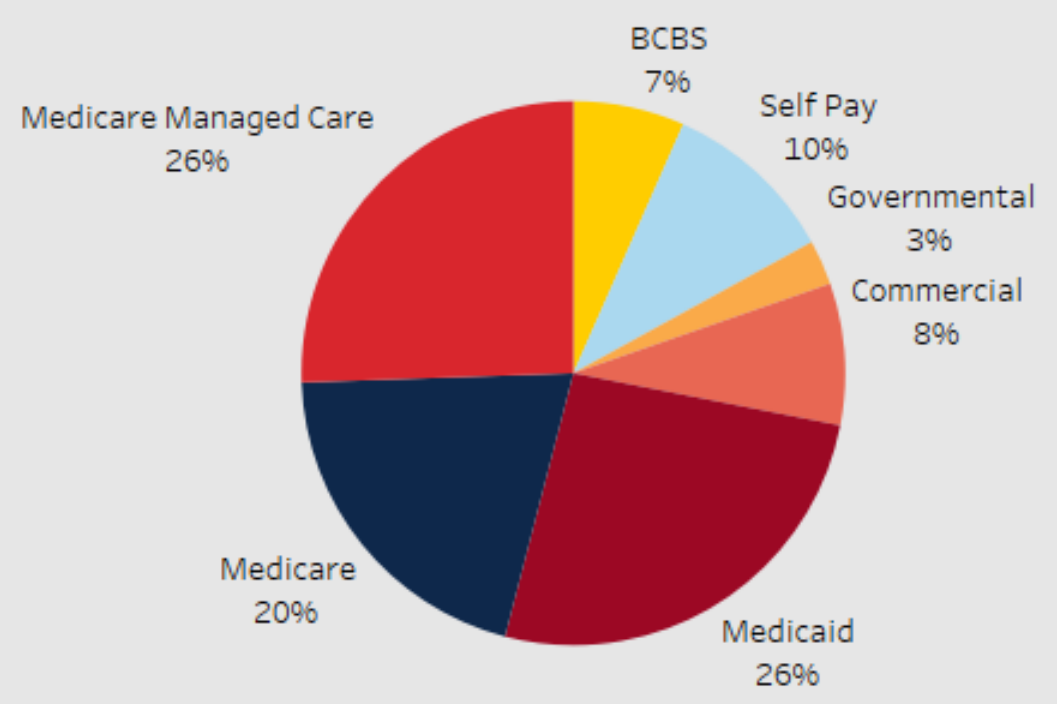

A mild delay in cash collections impacted by the holidays resulted in the collections goal being slightly off-target. Collections continue to return to normal as clean claims are processed by the team for submission to insurers.
